

- Tenon and mortise, in any combination, with one machine.
- Excellent cutting accuracy.
- Quick adjustment controlled by CNC with PC and graphical user interface.
- Anti-splinter cycle for excellent results with both solid wood and covered MDF.
- Not need for outside profiling or sanding of the doors.
- More durable and aesthetically pleasing blind joint (no visible joint on edge of board).
- The workcycle is very fast; it is possible to machine 50 - 80 doors per hour.

## CNC Mitering, Tenoning, Mortising

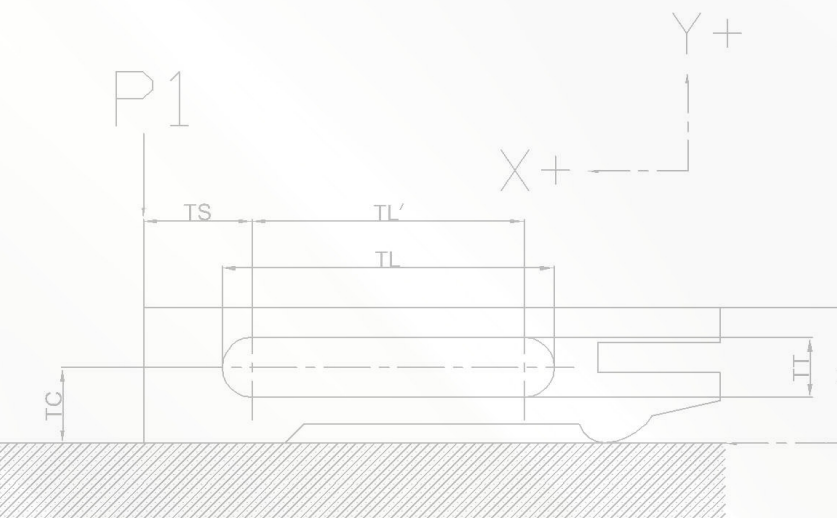

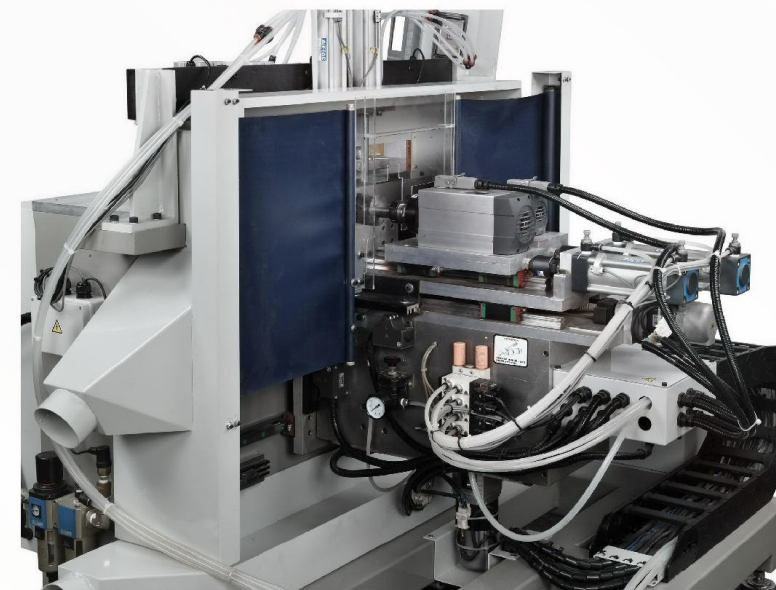

### PC-BASED CNC CONTROL

The machine is equipped with a PC-based CNC control as standard equipment. It is easy to learn and operate.

### M.P.G HAND WHEEL

The control box is equipped with an M.P.G. hand wheel, providing added convenience for tool setting and running testing.

### 10.4" SCREEN FOR CREATING AND SCELECTING PROGRAMS

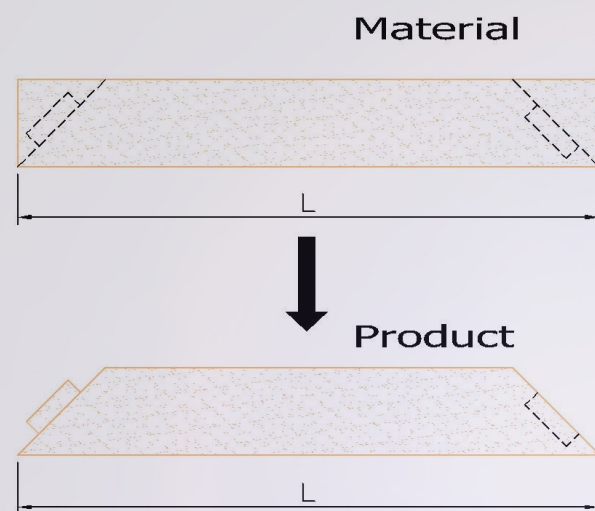

### Front Stopper

### AUTOMATIC LUBRICATOR

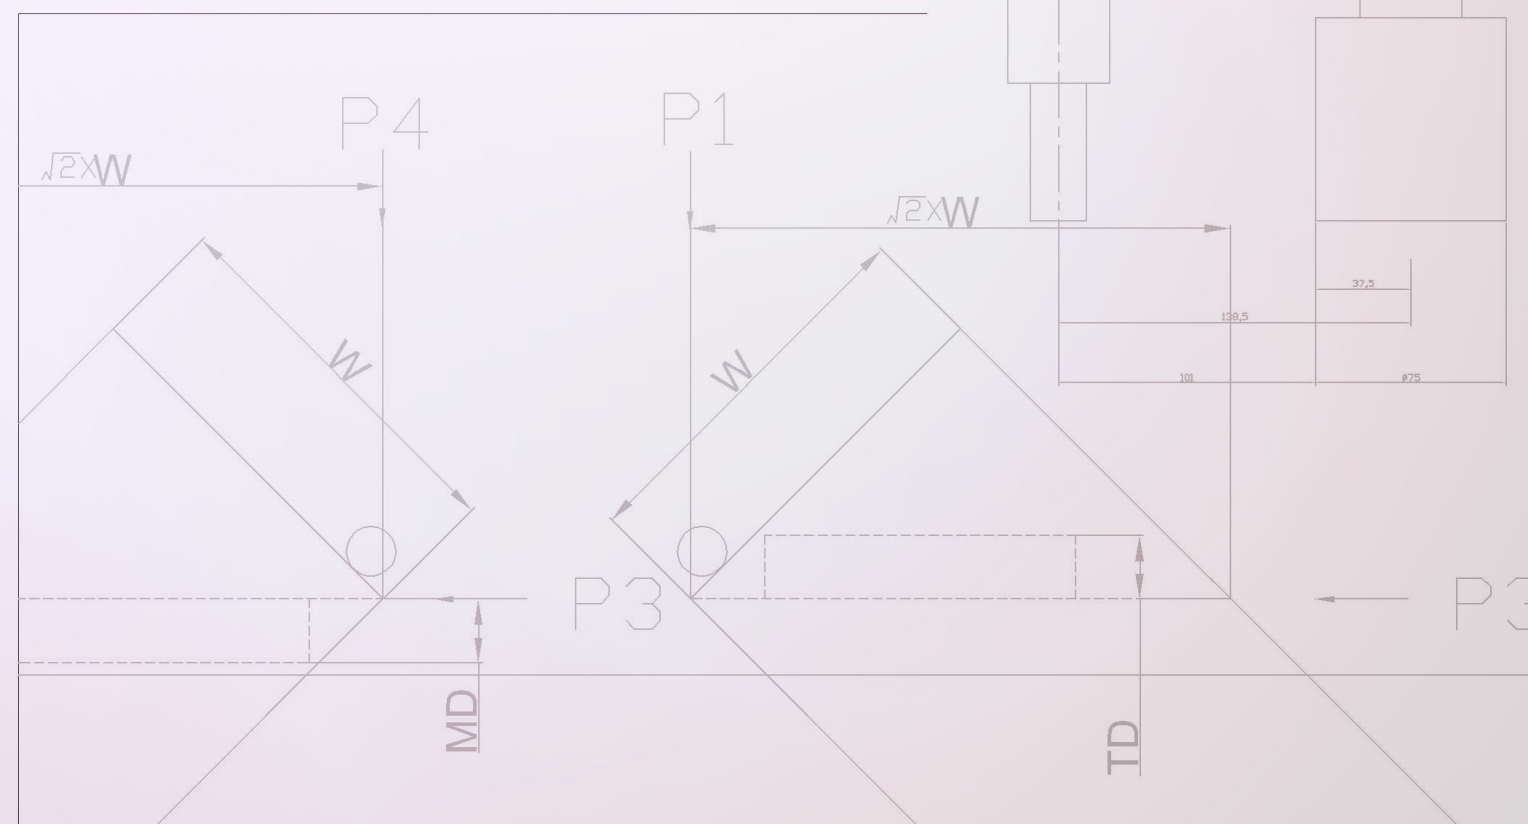

All linear guide ways and ball screws are automatically lubricated by a easures lubricator. It keeps all axes move smoothly.

## CNC MITER, TENON AND MORTISER K8-MDW

X, Y and Z axis CNC controlled
Hands free from pinch point with hand cycle start
6KW miter and tenon spindle
3.3KW mortise spindle
X axis rack and pinion
Y axis rotary screw and nut
Z axis rotary screw and nut
Spindles on common toolplate
Two working zones
Two cylinder clamping & 2 cylinder fixed position
Square rail bearings
Lubrication-Automatic
Multi axis controller
Unlimited program storage
Material width : 160mm
Material thickness: 75mm
N.W.: 860Kg G.W.: 1000Kg
Packing size: 205/160/150cm
